

One Health Master Training Program Completion Ceremony Held

On Tuesday, January 30, 2024, the "One Health Master Training Program Completion Ceremony" was held at the Fukuoka Prefectural Government Office.

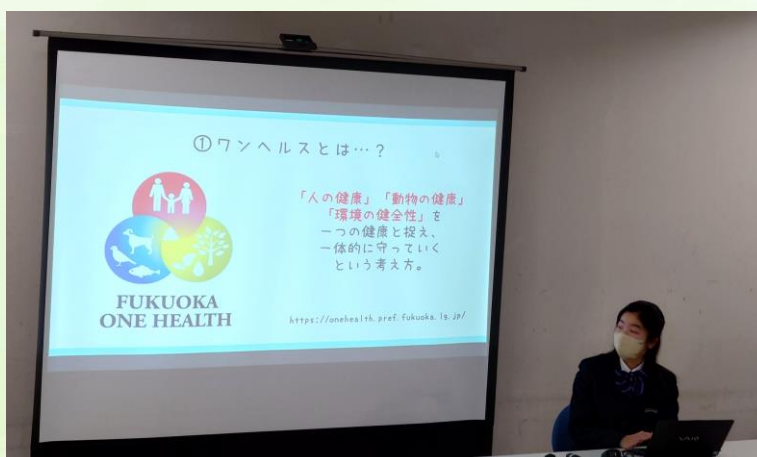

〈What is "One Health Master"?〉

"One Health Master" is the person who is able to teach the basics of One Health (philosophy, history, current status) to practical examples of One Health initiatives, and is actively involved in promoting awareness of One Health.

First, program participants gave presentations on "What I want to tell about One Health" at the venue.

Afterwards, a ceremony was held to celebrate the completion of the program for those who have been certified as One Health Masters.

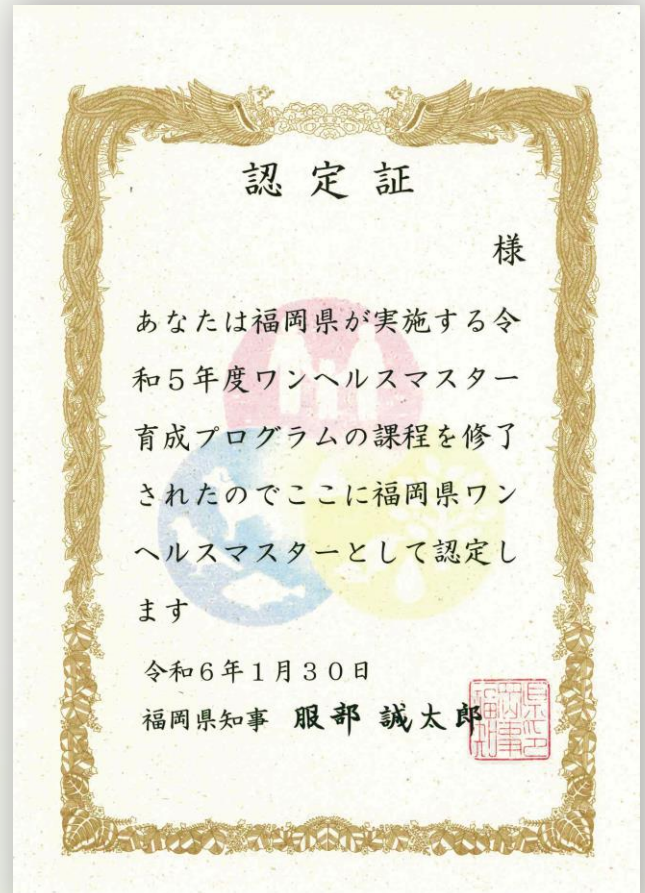

Those who have been certified as Masters will continue to work on educational activities

Presentation by participant

(Group work)
- 7th Fukuoka Prefectural Government
(Presentation and completion ceremony)

The paper for the certificate is made of environmentally friendly banana paper.

【Banana Paper】

This "fair trade" paper is made from "banana fiber" taken from organic banana stalks, which until now had only been discarded, and recycled paper or certified forest pulp is added.

※ Fair trade is a movement that aims to improve the lives and independence of producers and workers in developing countries who are in a weak position by continuously purchasing raw materials and products from developing countries at fair prices.
