

“Symposium on Building Momentum for Osaka-Kansai Expo” was held.

On Saturday, March 2, 2024, a symposium entitled "Fukuoka Prefecture x Osaka-Kansai Expo Symposium for Building Momentum: One Health for a Future Society that Shines with Life" was held at the Fukuoka City Science Museum in Ropponmatsu, Chuo-ku, Fukuoka City.

The symposium was organized by the Secretariat of the Headquarters for Promoting International Expositions, Cabinet Secretariat, with the aim of building momentum for the Osaka-Kansai Expo to be held from next April.

The symposium is designed to promote awareness of the Osaka-Kansai Expo, whose theme is "Designing a Future Society that Shines with Life," and to encourage people in Fukuoka Prefecture, which promotes the "One Health" concept of "human and animal health and environmental health as one" to think together about "One Health", the Expo, and the future society that lies ahead.
